

Staff Attitude Survey 2007

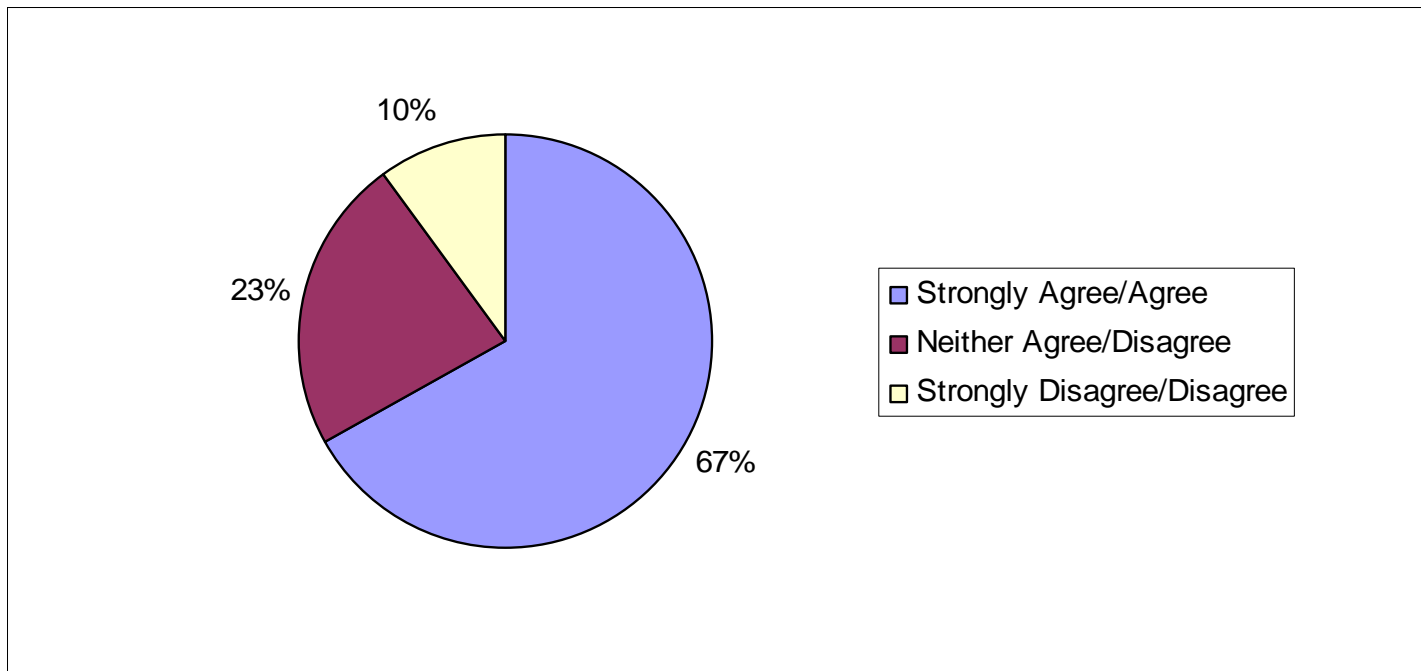

- Every two years, we use our confidential and independently administered Employee Survey to explore employee satisfaction levels across Audit Scotland.
- The 2007 survey was addressed to all employees with an outstanding response rate at just over 85% per cent. This is far beyond the benchmark response rate for most staff surveys.
- The feedback we gain from our Employee Survey enables us to understand how our employee's feel about working for Audit Scotland and enables us to respond to their emerging needs.
- What follows is an extract of the complete survey, focussing on 5/6 key questions that most employers ask their staff.
- We also benchmark our results with external employer organisations in order to provide a context for the results we have obtained.

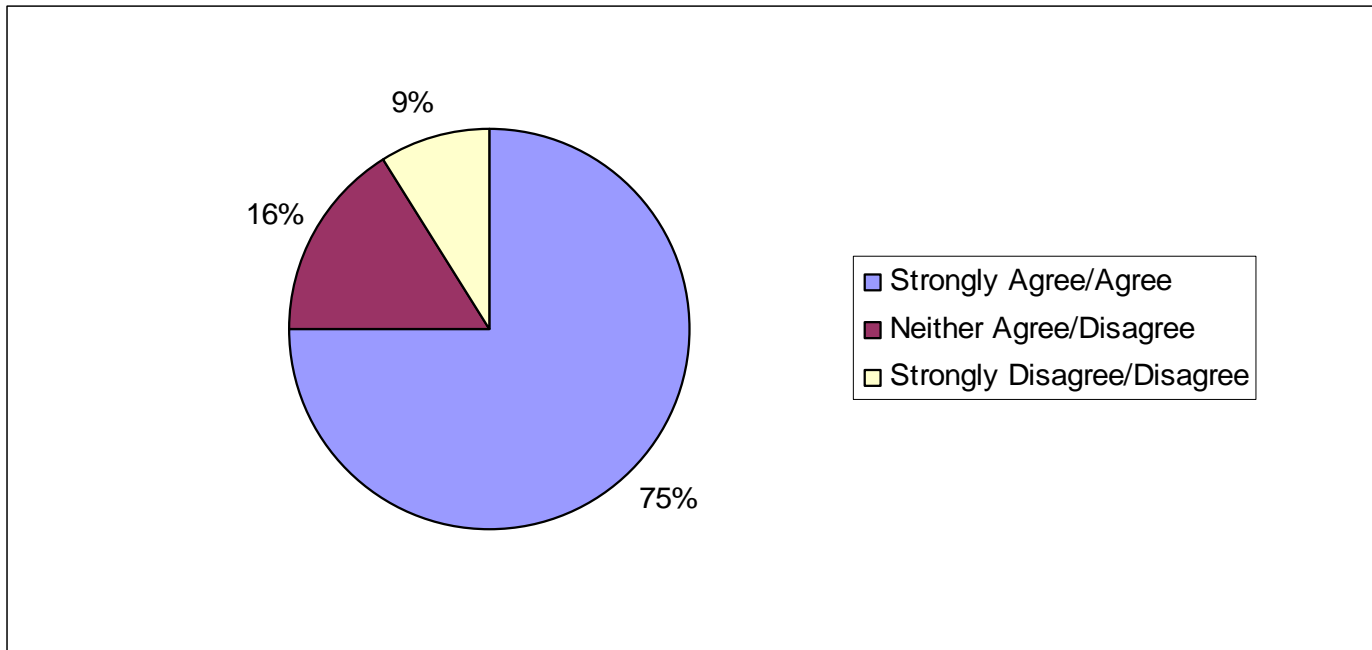

I am proud to work for Audit Scotland

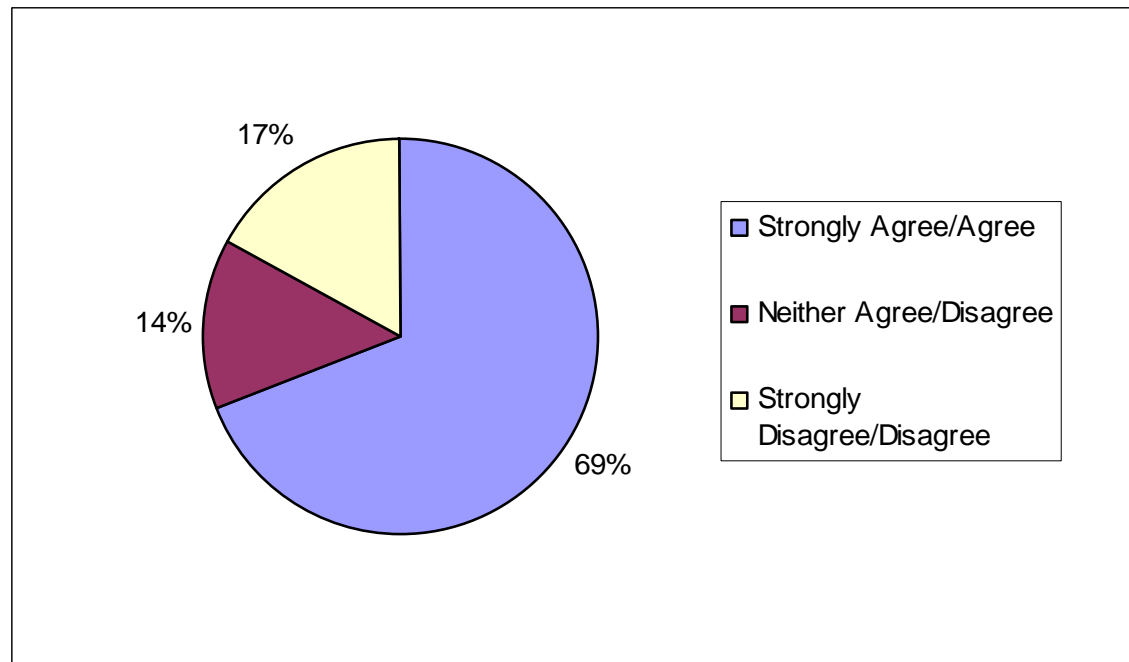

I rate Audit Scotland highly when compared to other employer organisations I know about

I intend to still be working with Audit Scotland in 12 months

Considering everything, I am satisfied with Audit Scotland at the present time

Considering everything I am happy with the job I do
